

УТВЕРЖДАЮ

Зав. кафедрой оториноларингологии
профессор

Коркмазов М.Ю.

28.08.2025 г.

**Lecture schedule on the subject "Otolaryngology"
for students of the medical faculty of group 527**

№	Тема лекции	Дата	Преподаватель
1	Introduction to otolaryngology. Clinical anatomy, physiology of the ear. Methods of studying the auditory analyzer. Physiological features of the elderly and old age.	01.09.25 10:15-11:50 in small hall №3	Korkmazov M.Yu.
2	External otitis. Acute otitis media. Features of the course in infectious diseases. Chronic purulent otitis media. Clinical forms and features of the clinical course, treatment. Mastoiditis. Atypical forms of mastoiditis. Otogenic neuritis of the facial nerve.	02.09.25 10:15-11:50 in small hall №3	Dubinetz I.D.
3	Clinical anatomy, physiology of the vestibular analyzer. Methods of vestibular analyzer research. Labyrinthitis. Non-purulent ear diseases. Sensorineural hearing loss. The concept of deaf-muteness. Rehabilitation. Hearing aid fitting. Cochlear implantation.	03.09.25 10:15-11:50 in small hall №3	Lengina M.A.
4	Clinical anatomy, physiology of the nose and paranasal sinuses. Methods of examination of the nose and paranasal sinuses. Classification of rhinitis and sinusitis. Acute and chronic rhinitis. Acute and chronic sinusitis.	04.09.25 10:15-11:50 in small hall №3	Lengina M.A.
5	Otogenic and rhinogenic intracranial complications: meningitis, brain and cerebellar abscesses, sinus thrombosis, sepsis. Clinical presentation, diagnostics and treatment, prevention. Rhinogenic orbital complications.	06.09.25 08:30-10:05 in small hall №3	Dubinetz I.D.
6	Clinical anatomy and physiology of the larynx. Methods of larynx examination. Inflammatory diseases of the larynx. Stenosing laryngotracheitis and its differential diagnostics with laryngeal diphtheria. Acute and chronic stenosis of the larynx. Laryngeal edema. Intubation, conicotomy, tracheotomy. Peculiarities of elderly and senile age.	06.09.25 10:15-11:50 in small hall №3	Kornova N.V.
7	Clinical anatomy and physiology of the pharynx, research methods. Hypertrophy of the pharyngeal lymphoid ring. Acute pharyngitis. Chronic pharyngitis. Classification of acute and chronic tonsillitis. Chronic tonsillitis. Paratonsillar, parapharyngeal, retropharyngeal abscesses.	09.09.25 08:30-10:05 in small hall №3	Dubinetz I.D.
8	Injuries and foreign bodies of the nose, pharynx, larynx, trachea and esophagus, their complications. Nosebleeds. Medical tactics for foreign bodies and injuries of ENT organs. Chemical and thermal injuries. Benign and malignant neoplasms of ENT organs. Classification. Features of clinical treatment. Early diagnostics. Treatment principles. Features of elderly and senile age.	09.09.25 10:15-11:50 in small hall №3	Lengina M.A.
